

What are cookies?

We use cookies on our website. Cookies are small files that a web server stores on your device when you visit a website.

What are these files used for?

Cookies make the website more user-friendly and functional.

Purposes for which we use cookies:

- Authenticating the user on the website and maintaining the user session
- Enabling processes necessary for the full functionality of the website
- Conducting analytics, research, and audience measurement

What types of cookies do we use?

- Session cookies – temporary files that remain on the user's device until they log out of the website or close their browser
- Persistent cookies – files that remain on the user's device for the period specified in the cookie settings or until manually deleted by the user

The cookies we use are safe and do not harm the user in any way. They do not store personal data or other confidential information.

The user can limit or disable cookies on their device at any time. If this option is chosen, the website will remain accessible, except for features that inherently require cookies to function.
